

Digital Photo Frame

D10 (Champagne Gold)

Brief introduction :

D10 makes it easy to share and enjoy family memories, no matter the distance. Its 10.1" HD IPS anti-glare touchscreen provides clear viewing and simple operation, while 32GB built-in storage, unlimited cloud storage, and up to 128GB TF card expansion give you plenty of room for photos and videos. Through the ARZOPA APP, multiple family members can send new moments directly to the frame from anywhere. With smart album management, personalized Gift Mode, and continuous system updates, D10 is more than a digital photo frame—it's an easy way to keep memories and loved ones connected.

Main selling points:

- **10" IPS Anti-Glare Touchscreen Display:** Provide a larger viewing area with clear images and comfortable operation.
- **32GB Built-in Storage + Unlimited Cloud Storage + Supports Up To 128GB TF Card Expansion:** Store, update and expand photo and video collections through local storage, cloud sharing or TF card.
- **Smart Album Management:** Customize albums, slideshow order, playback duration and transition effects.
- **Custom Gift Mode & Elegant Design:** Add personalized messages and create a customized gift for birthdays, holidays and special occasions.

Easy-entry family sharing

1. Clear Viewing. Easy Touch Control. 【10.1" HD IPS Anti-Glare Touchscreen】

Enjoy clear, vibrant photos on a 10.1" IPS display with an anti-glare finish for comfortable viewing. Responsive touch control makes browsing photos and managing albums simple and intuitive.

2. More Space for Every Memory 【32GB Storage + Unlimited Cloud + Up to 128GB TF Card】

Keep more of your favorite moments in one place. With 32GB built-in storage, unlimited cloud storage, and support for up to 128GB TF card expansion, D10 gives you flexible ways to store and expand your photo and video collection.

3. Share Moments from Anywhere 【ARZOPA APP + Multi-User Sharing】

Send photos and videos directly from your smartphone through the ARZOPA APP—even when you're miles away. Multiple family members can contribute to the same frame, turning D10 into a shared family album that keeps everyone connected.

4. A Personal Gift That Keeps Updating 【Smart Albums + Custom Gift Mode】

Customize slideshows, playback duration, and transition effects to create a personalized viewing experience. Add a special message with Gift Mode, making D10 a thoughtful choice for birthdays, holidays, anniversaries, and family occasions.

5. Smarter with Every Update 【ARZOPA Self-Developed System】

Powered by ARZOPA's self-developed system with continuous updates and feature enhancements. Beyond photo sharing, it supports clock, date, weather, location display, Live Photos playback, and more—bringing a smarter and more dynamic experience to everyday viewing.

Target user:

-  Sleep Mode
-  Auto Slideshow

04 Social & Family Interaction

Keep the Whole Family Connected

-  Remote Sharing via ARZOPA App
-  Multi-User Family Sharing
-  Like & Comment
-  Share Moments Instantly

Digital Photo Frame — Frequently Asked Questions

01 How do family members send photos remotely?

Connect the frame to Wi-Fi, pair it with the Arzopa app, and invite family members through the supported sharing flow. Demonstrate pairing during sell-in training.

02 Is Wi-Fi always required?

Wi-Fi is required for remote uploads and connected app/cloud features. Photos already stored locally can be viewed without a continuous internet connection.

03 Can the Smart Calendar be used without power?

No. The device has no built-in large-capacity battery and requires continuous power. It is designed as a fixed home smart display, not a portable tablet.

04 Can it switch portrait and landscape?

Yes. The deck lists gravity-sensor orientation switching. Confirm the stand or wall-mount orientation during installation and keep vents/cables unobstructed.

05 Do all three models support touch?

The D10, D14 and D14 Pro pages in this deck list touch support. Use touch for setup, album management and playback controls.

06 What should I do if it will not connect or sync?

Restart the frame and router, re-enter Wi-Fi details, update/reopen the app and retry pairing. If the issue persists, record the model/serial number and escalate.

SALES NOTE

Before publishing externally, confirm the live app name/version, cloud-storage terms, supported media formats, card type and market-specific warranty. These service-dependent details can change faster than the hardware specification.

Digital Photo Frame — Frequently Asked Questions

07

How do I import photos or videos from external storage?

Copy files to an SD / TF card or USB drive, insert it into the frame, then open General Settings → File Management to select and import the files.

08

Which file formats are supported?

Photos: JPEG, JPG, PNG, WEBP and HEIF. Video: MP4, 3GP or 3G2, under 125MB, no more than 1080p and H.264 encoded. Live Photos display as still images.

09

Can the frame be used without Wi-Fi?

Yes for files already stored locally or imported from external storage. Wi-Fi is required for phone uploads, remote sharing and connected cloud features.

10

Is this a rechargeable product?

No. It is a plug-in smart display with no large-capacity built-in battery. The design supports scheduled screen-off and sleep settings.

11

How do I back up the frame data?

Insert an SD / TF card or USB drive. Auto-backup is enabled by default and runs about every three days; manual backup is available under General Settings → Backup & Restore.

12

How can I display just one photo?

Turn off slideshow playback. The frame can then keep one selected photo on screen until playback is enabled again.

SALES NOTE

Before publishing externally, confirm the live app name/version, cloud-storage terms, supported media formats, card type and market-specific warranty.
